

INTALERESM

Intalere OptiAnalytics Spend

Spend analytics to drive procurement insights.

Intalere OptiAnalytics Spend delivers both spend and contract visibility to continually uncover savings opportunities, help you make informed decisions and bring more efficiency to your procurement functions.

Healthcare organizations are faced with the continued rise of healthcare expenses and must identify ways to boost their efficiency across all functions of their organization. Their strategy must include reduction of operating expenses, as well as awareness of their cost structure and how each department is performing in relation to cost and quality of care. With limited resources and budgets, it is imperative that healthcare organizations have access to reliable spend analytics software that provides the procurement insights necessary to achieve measurable savings.

Our Value

Intalere OptiAnalytics Spend will bring your fragmented procurement data together to help you manage the cost of care, improve performance and enhance quality of care decisions. You will have the ability to track and identify spend with non-contracted suppliers in categories where a contract may be available. Additionally, you can identify spend within your organization that may be isolated.

Get answers to important business questions including:

- Is our data helpful in deciding what to buy, how to buy and from whom?
- Do we understand which suppliers we are spending the most with?
- Are top suppliers compliant with our organization's standards and relevant regulations?
- Do we understand our organizational spend across departments and how it is being managed?
- Do we have the ability to visualize data in order to make better sourcing and supplier decisions?

How It Works

- There is no charge for implementation.
- Implementation will take approximately 2-3 weeks from start to finish.
- We will then work with you to receive your purchase order information on a monthly basis to monitor ongoing needs.
- There is no need for a dedicated analytics team. Our spend tool can be used by various users such as buyers, accounting, financial analysts, supply chain, etc.

About Intalere

Intalere's mission focuses on elevating the operational health of America's healthcare providers by designing tailored, smart solutions that deliver optimal cost, quality and clinical outcomes. We strive to be the essential partner for operational excellence in healthcare through customized solutions that address customers' individual needs. We assist our customers in managing their entire spend, providing innovative technologies, products and services, and leveraging the best practices of a provider-led model.
